Tel.: 559-271-5984 • Fax: 559-271-5987 • PPO 14528

Fresno based Company grows nationwide and thrives in today's tough economy.

AmeriGuard Security Services, Inc. was recently awarded a large contract to provide Armed Security and Patrol Services to the Department of Health and Human Services for the Center for Medicaid and Medicare Services (CMS) in Baltimore, MD.

This contract will employ approximately One Hundred Twenty armed officers that will perform duties such as securing the main gate of the facility and all ancillary entry points, providing perimeter security and performing building access control using vehicles and security cameras throughout this large facility. The main building houses up to six thousand CMS government personnel. Security is provided 24 hours a day, seven days a week under all conditions and all threat levels.

Large Military and Government contracts are not uncommon to AmeriGuard, says Lawrence Garcia, President/CEO: "We have been blessed with numerous contracts in many states over the last few years; we are protecting some of our nation's most important assets and buildings."

AmeriGuard is responsible for Security Services to the U.S. Navy in San Diego, Point Loma, Coronado, El Centro, and Lemoore guarding nuclear warships, aircraft carriers and submarines including advanced fighter aircraft. We have U.S. Coast Guard contracts in Alameda and Sacramento where we protect all entry points, plus perform perimeter patrol performing many of the duties that the military and base police provided in the past.

We secure critical radar stations on the East Coast and the West Coast for the Federal Aviation Administration. We have several other notable clients for instance: the Internal Revenue Service, Federal Protective Services, Department of Veterans Affairs, Federal Drug Administration, U.S. Department of Agriculture, etc... We provide armed security for the 4th largest Federal building in the National Capitol Region which houses nearly 10,000 government employees, civilians and military personnel and requires 250 armed officers to protect it.

We also have extensive experience in armed bailiff services and courtroom security. Our officers utilize magnetometers, x-ray equipment, and handheld wands while controlling the ingress and egress of personnel. Clients include the Stanislaus County Courts System, the Office of Health and Human Services and the Social Security Administration.

AmeriGuard is headquartered in Fresno, California and started in 2000. During that time, we have grown from five employees to over seven hundred. We have diversified our services and started four other companies. (1) AmeriGuard Security Systems, where we install burglar alarms and security camera systems, monitor alarms and offer sales and service of security equipment; (2) we offer background checks, and pre-employment screening of your current or potential new hires, along with Live Scan fingerprinting, to help reduce employers risk; (3) we own our own training academy called "The Training Point"; and (4) we operate a party and event rental business which was started for my son to initiate the entrepreneurial spirit within him.

AmeriGuard Security has been involved in some of Fresno's largest and most recognizable projects such as: the Fresno Grizzly stadium, Community Regional Medical Center, the new Downtown Federal Building, the Fresno Juvenile Justice Campus, the Save Mart Center, and many others... When businesses need professional and reliable security services, they contract AmeriGuard Security for all their security needs.

It is nice to see that good old entrepreneurial spirit, timely and reliable services still pays off in today's fast paced business world. AmeriGuard has created a name for itself on a National level and we have demonstrated that Fresno based companies have the ability to garner nationwide recognition and can compete with the largest companies in the world.
